

# MATHLETICS

## Mathletics arrives at CPS!

Staff and students are excited about the arrival of Mathletics at Craigieburn Primary. Mathletics is a web-based learning program which integrates home and school learning via the internet. All children in Grades 1-6 have received a username and password to enable them 24 hour access to this fantastic Maths site. Students have the opportunity to improve their maths skills while having lots of fun. We recommend that you spend some time looking at the program with your child so that you can gain the greatest understanding of how Mathletics will benefit your child.
